

JUSTIN PLAMMOOTIL VARGHESE

Rome, Italy | +39 366 111 3841 | pv.justin16@gmail.com | [linkedin.com/in/pv-justin](https://www.linkedin.com/in/pv-justin)

Junior Data Scientist | Python, SQL, Power BI | Statistical Analysis & Data Visualization

PROFESSIONAL SUMMARY

Junior Data Scientist with hands-on experience in statistical analysis, data pipeline development, and business intelligence using Python (Pandas, NumPy, SciPy, Scikit-learn), SQL, Power BI, and Tableau. Designed and executed "The Invisible Patient" — a multi-source data pipeline analyzing healthcare exclusion across 500,000 undocumented workers in Italy, integrating 6 public datasets, building a validated synthetic microdata engine, and conducting chi-square hypothesis testing (all $p < 0.001$). Built interactive dashboards that improved workplace safety by 15% and reduced operational costs by 15%, and drove 60% audience growth through data-backed strategy. Track record of presenting data-driven insights to senior leadership across diplomatic, logistics, and marketing environments.

PROFESSIONAL EXPERIENCE

Operations Assistant (Chauffeur & Administrative Support)

Mar 2025 – Present

Embassy of India — Rome, Italy

- Built automated tracking systems for fleet management, inventory levels, and supplies data for the Chancellery, reducing operational costs by 15% through optimized resource allocation and logistics planning.
- Analyzed operational cost data across 3 departments to identify savings opportunities, delivering actionable insights that informed Chancellery budgeting and procurement decisions.
- Monitored 5+ KPIs related to embassy operations including vehicle utilization rates, supply consumption trends, and event frequency, enabling data-driven planning for senior officials.
- Coordinated with the Chancellery to organize 10+ high-profile events at FAO headquarters, cultural festivals, and business meetings with international trade partners.
- Organized and coordinated logistics for a presidential visit, overseeing end-to-end arrangement planning to ensure an uninterrupted, protocol-compliant experience.
- Served as a cross-functional liaison between embassy departments, leveraging fluency in 4 languages (English, Italian, Hindi, Malayalam) to facilitate communication with diverse diplomatic staff.

Assistant Warehouse Manager

Jun 2024 – Feb 2025

Santa Srl — Rome, Italy

- Built interactive KPI dashboards in Power BI to monitor inventory turnover, order fulfillment rates, picking accuracy, and on-time delivery metrics, enabling data-driven operational decisions for stakeholders.
- Analyzed historical order data to identify daily and weekly volume patterns, enabling proactive staff allocation and reducing delivery delays through bottleneck identification.
- Oversaw end-to-end inbound logistics including gate entry, goods receipt invoice processing, incoming quality verification, space allocation, and purchase order reconciliation against bill of materials.
- Monitored supplier quality metrics and forecast order planning, ensuring alignment between procurement schedules and warehouse capacity.
- Improved workplace safety by 15% through incident data monitoring, root cause analysis, and implementation of data-backed safety protocols.
- Managed a team of 10 warehouse associates, using performance metrics to optimize task assignment during peak seasons and improve throughput.
- Presented operational analysis and KPI reports to warehouse leadership, translating complex data into actionable staffing and process recommendations.

Digital Marketing Analyst Intern

Jan 2024 – May 2024

aNumak & Company — Bangalore, India

- Analyzed campaign datasets using Google Analytics 4 and visualization tools, uncovering engagement patterns that contributed to 60% growth in the company's social media following.
- Conducted iterative content and audience testing across campaigns, improving client engagement rates by 7% through data-backed strategy adjustments.
- Built performance dashboards and ROI reports for stakeholders, translating raw campaign data into actionable marketing recommendations.

Co-Founder & Lead Designer

Jun 2023 – Dec 2023

Code Optix Solutions — Remote (Europe & Africa)

- Co-founded a digital solutions agency offering web design, UI/UX, and data dashboard services, delivering projects for 3 paying clients within the first 6 months of operation.
- Led a remote team of 5 distributed across Europe and Africa, managing cross-timezone project timelines, task delegation, and budget allocation.
- Built the company website and product offerings from scratch, handling end-to-end product development from concept through launch.
- Recruited and onboarded remote team members across multiple countries, establishing asynchronous workflows, roles, and quality standards.
- Analyzed user behavior data and session analytics to identify usability issues, driving design improvements that expanded client online reach by 10%.

DATA SCIENCE PROJECTS

- The Invisible Patient: Healthcare Exclusion of Undocumented Workers in Italy** | Python, Pandas, NumPy, SciPy, Seaborn, ReportLab
- Designed and executed an end-to-end data science project analyzing healthcare exclusion among ~500,000 undocumented workers in Italy's informal economy, integrating data from 6 sources including Eurostat EU-SILC, ISTAT, INAIL, and Lombardy STP records.
 - Built a synthetic microdata engine (n=2,000) with conditional dependency modeling to generate realistic variable relationships where individual-level data was unavailable due to privacy constraints.
 - Validated synthetic data distributions against real Eurostat and ISTAT regional aggregates to ensure representativeness before conducting hypothesis testing.
 - Engineered a composite healthcare access risk score by normalizing and weighting 4 indicators across 20 Italian regions.
 - Conducted chi-square independence tests (4 hypotheses, all $p < 0.001$) and Pearson correlation analysis across 10 variables, identifying statistically significant disparities in healthcare access.
 - Produced 12 publication-quality visualizations and automated PDF report generation via ReportLab; full modular codebase published on GitHub.
 - Leveraged AI-assisted workflows (Claude) to accelerate research synthesis, code optimization, and project management.
- Airbnb Market Trends Analysis (European Cluster)** | Python, Pandas, Matplotlib
- Conducted statistical analysis on Airbnb listing data across multiple European regions, identifying pricing trends, occupancy patterns, and feature-to-booking-rate correlations.
- Netflix Top 10: Weekly Chart-Toppers Analysis** | Python, Pandas, Matplotlib
- Performed end-to-end EDA on Netflix weekly top 10 data (Jun 2021–Aug 2023), uncovering seasonal trends and regional viewership patterns through statistical correlation analysis.
- Sales Data Pipeline Debugging** | Python, Data Cleaning, ETL
- Resolved data quality issues in an ETL pipeline by debugging Python scripts, implementing validation checks, and optimizing transformation logic.
- Ultra-Marathon Participation Analysis** | Python, Data Visualization
- Analyzed participation and performance trends across race categories, building visualizations to reveal demographic patterns and benchmarks.

EDUCATION

- M.Sc. Digital Marketing and Business Transformation** Jun 2025
Rome Business School — Rome, Italy
- Elective in Big Data Analytics in Business | Digital Customer Management: Data, Insights & Analytics
- Data Science with Python Track** In Progress
DataCamp — Online
- Data Manipulation with Pandas | Intermediate Python | Scikit-learn Fundamentals
- BBA (Hons) in Computer Application** 2022
Bharathiar University — Coimbatore, India
- Capstone: Economic Impact Analysis of Non-Resident Keralites Returning During COVID-19 (Google Sheets, Excel)

CERTIFICATIONS

- Excel: Advanced Formulas and Functions – LinkedIn Learning
- Career Essentials in Generative AI – Microsoft & LinkedIn
- Google Analytics 4 (GA4) Essential Training – LinkedIn Learning
- Programming in Python – GeeksforGeeks

TECHNICAL SKILLS

Programming & Analysis: Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn, Scikit-learn), SQL, Jupyter Notebook
Data Visualization & BI: Power BI, Tableau, Google Data Studio, Excel (Pivot Tables, INDEX-MATCH, Power Query, Dashboards)
Statistical Methods: EDA, Statistical Modeling, A/B Testing, Regression Analysis, Time-Series Analysis, Classification, Clustering, Chi-Square Testing, KPI Tracking
Analytics Platforms: Google Analytics 4, Google Ads, Meta Ads Manager, SEMrush, HubSpot
Tools & Version Control: Git, GitHub, ReportLab, Figma, Canva, Microsoft Office Suite

LANGUAGES

Malayalam (Native) | English (C1/C2) | Italian (B2) | Tamil (B2) | Hindi (B1) | French (A2)

VOLUNTEER EXPERIENCE

Italian Red Cross — Rome, Italy (May–Jun 2024). Supported humanitarian initiatives; completed first aid and emergency response training.
Marthoma Yuvajana Sakhyam — Kerala, India (Jan 2014–Present). Led community outreach and youth empowerment initiatives focused on leadership development.
